Principles of Planetary Physics
Planetary Sciences 505A
Kuiper 312, TTh 12:30-13:45

Instructor: Prof. Kristopher G. Klein, Kuiper Space Sciences 431; kgklein@arizona.edu
Office Hours: Thursday: 10:30-12 noon; Wednesday: 10 - 11:30pm (or by arrangement)
This class is scheduled to be taught in the in person modality.

This course will use a D2L website for assignments, lecture notes, and communications. Email communications with Prof. Klein should include **PTYS 505A** in the subject line and be from your UA email address; I will endeavor to respond to emails within one business day.

As this is a three credit course, there is an expectation of 90 hours of reading, homework, and other studies to be done by the student outside of lecture.

Course and Learning Objectives

A one-semester survey of physical properties relevant to planetary sciences.

This course presents an introduction to the physics of planetary and interplanetary gases, fluids and plasmas. The semester will be divided into studies of Thermodynamics, Kinetic Theory, Hydrodynamics, and Plasma Physics, all with a focus on solar-system applications. Specific topics include magnetohydrodynamics, planetary atmospheres, turbulence, the solar wind, and solar and planetary magnetic fields.

This course is a complement to PTYS505B, which covers the physical processes controlling planet formation, the orbital and rotational dynamics of planetary systems, the mechanical and thermal aspects of a planetary interior, and the dynamics of the Earth-Moon and other satellite systems.

During the course, students will learn about:

- *Thermodynamics & Kinetic Theory*; studying the basic processes that control the flow of energy in matter,
- *Hydrodynamics*; deriving and studying the fundamental equations that describe the flow of fluid matter, as relevant to planetary systems, and
- *Plasmas*; including introductions to the behavior of the most common state of baryonic matter, commonly used self-consistent descriptions for plasma dynamics, and a plethora of plasma processes relevant to planetary systems, e.g. waves, interactions with planetary magnetospheres, and magnetic reconnection.

Learning Outcomes:

Upon the completion of this course, students will:

- Have gained a broad knowledge of kinetic physics, hydrodynamics, and plasma processes relevant to space and planetary systems.
- Demonstrate their ability to convey information about physical planetary processes, both in written and oral formats, through the construction of a set of lecture notes.
- Be able to apply their knowledge to specific physical systems relevant for their area of focused research.

Texts and Course Materials

The course will draw from a number of texts and references, but the necessary elements will be included in the class notes, which will be posted on D2L and updated throughout the semester.

Homework

There will be approx. bi-weekly homework assignments throughout the semester. Assignments will be posted in advance on the D2L website. The up-to-date class schedule can also be found here. Each homework will have at least one week for completion from posting, then they will be graded and returned to you within a week. You may discuss the homework with other students, but be sure the final work is yours. Do not let others copy your homework; it could result in your getting flagged for plagiarism, and **you receiving a zero for the assignment.**

Late Homework

Late homework will not be accepted except in very exceptional cases. For scheduled absences like religious holidays and university travel, the homework can be downloaded from D2L in advance so that it can be turned in early. In cases of a sudden family or medical emergency, late homework may be accepted, but only before the graded homework is returned and solutions posted.

Exams

There will be two midterm exams, each covering approximately half of the course material. The dates of the exams are listed on the class schedule; please alert me at least two weeks in advance if you have an approved conflict.

Exhibiting suspicious behavior during an exam may result in confiscation of your exam and/or a zero grade. No cellphones or laptops are allowed during the examination. A single page sheet of notes produced by the student will be allowed.

Missed Exams

If you need to miss an exam for a University-approved reason, contact Dr. Klein as soon as possible. If you know that you will need to be absent or will miss course deadlines, you are expected to make every effort to inform us before it occurs so that we can make arrangements in advance. Note that illness will require documentation as described in the Absence and Class Participation Policy below. Skipping the exam without a University-approved excuse or proper documentation of your absence will result in a zero grade.

Final Project

This course will have a final project that will involve selecting a fundamental physical process not covered in detail in the class, researching this topic, preparing a set of lecture notes, and recording yourself presenting the lecture.

There will be due dates throughout the semester for selecting and proposing a topic, turning in a draft for feedback and the opportunity to revise and resubmit, and final submission of the project. Details on this project are posted on D2L.

Lectures and Class Participation

Most lectures will be presented by Dr. Klein, although occasionally a guest lecturer may lead the class. The lecture notes and associated readings will be placed on D2L before the class. Lectures will be interactive, including participation in the form of questions and class discussion.

Grading Scale & Policies

The overall grade associated with this course will have the following weights:

Midterm Exams: $2 \times 15\%$	Homework: 50%	Project: 20%

Final Letter Grades will be assigned as follows, and will be calculated to the nearest 0.1%. A curve may be considered, depending on the observed distribution of scores at the end of the semester.

A: $\geq 90\%$	B: $\geq 80\%$	C: $\geq 70\%$	D: $\geq 60\%$	E: $< 60\%$

University policy regarding grades and grading systems is available here. Requests for incomplete (I) or withdrawal (W) must be made in accordance with University policies, which are available here and here respectively.

Makeup Policy for Late Registering Students

Students who register by the end of the second week of class may be given an opportunity to make up missed assignments within a reasonable amount of time, to be mutually agreed upon by the student and instructor.

Regrades

All your work will be graded by Dr. Klein. Although I will make every effort to evaluate your work thoroughly and fairly, I am only human. If you think there is an error in grading your homework, please contact me; I will look at your work again and return it to you with a response, usually within a week. **You must report any grading errors within a week of the return of your assignment/exam to receive a regrade.**

Questions & Concerns

It is very important that you let the instructor know about any concerns about any aspect of the class as soon as they arise. There are many ways to contact us about questions or concerns about the course material and your grade. Weekly office hours are the best place to ask questions and get help. You are also welcome to talk to me after class, or you can make an appointment to meet with me outside of office hours if that works better.

Classroom Attendance

If you feel sick, or may have been in contact with someone who is infectious, stay home. Except for seeking medical care, avoid contact with others and do not travel. Notify your instructor if you will be missing a course meeting or an assignment deadline. Non-attendance for any reason does not guarantee an automatic extension of due date or rescheduling of examinations/assessments.

Please communicate and coordinate any request directly with your instructor. If you must miss the equivalent of more than one week of class, you should contact the Dean of Students Office (`DOS-deanofstudents@email.arizona.edu`) to share documentation about the challenges you are facing.

Academic Advising

If you have questions about your academic progress this semester, please reach out to your academic advisor (`https://advising.arizona.edu/advisors/major`). Contact the Advising Resource Center (`https://advising.arizona.edu/`) for all general advising questions and referral assistance. Call 520-626-8667 or email to `advising@.arizona.edu`

Life Challenges

If you are experiencing unexpected barriers to your success in your courses, please note the Dean of Students Office is a central support resource for all students and may be helpful. The Dean of Students Office can be reached at (520) 621-2057 or `DOS-deanofstudents@email.arizona.edu`.

Physical and mental-health challenges

If you are facing physical or mental health challenges this semester, please note that Campus Health provides quality medical and mental health care. For medical appointments, call (520) 621-9202. For After Hours care, call (520) 570-7898. For the Counseling & Psych Services (CAPS) 24/7 hotline, call (520) 621-3334.

Classroom Behavior Policy

We all have a shared responsibility to create a positive learning environment free from distractions. If you arrive late to class or need to leave early, please choose a seat on the aisle and enter/exit quietly. Please silence your phone during class. If you need to accept an emergency phone call, exit the lecture hall fully before talking on the phone. Behaviors that could be disruptive to other students are not acceptable and disruptive students will be asked to leave. Examples of potentially disruptive behaviors making phone calls, web surfing, watching videos, or reading a newspaper.

Department policy *forbids any outside food or drink, except water, in the lecture hall.*

The UA Threatening Behavior by Students Policy prohibits threats of physical harm to any member of the University community, including to oneself.

UA Academic policies and procedures are available here. Student Assistance and Advocacy information is available here.

Accessibility & Accommodations

Our goal in this classroom is that learning experiences be as accessible as possible. If you anticipate or experience physical or academic barriers based on disability, please contact Dr. Klein and the Disability Resource Center (520-621-3268) so that reasonable accommodations can be arranged. Additional information on reasonable accommodations can be found at the Disability Resource Center.

Code of Academic Integrity

Students are encouraged to share intellectual views and discuss freely the principles and applications of course materials. However, graded work and exercises must be the product of independent effort unless otherwise instructed. Students are expected to adhere to the UA Code of Academic Integrity as described in the UA General Catalog.

Student who plagiarize will get a zero for the assignment.

If you have questions about how to cite sources or plagiarism, please talk to the instructor. The UA libraries also provide references on the distinction between citation and plagiarism.

UA Nondiscrimination and Anti-Harassment Policy

The University is committed to creating and maintaining an environment free of discrimination. The classroom is a place all are encouraged to ask questions and express well-formed opinions and their reasons for those opinions. We want to create a tolerant and open environment where comments and questions can be expressed without resorting to bullying or discrimination of others.

Confidentiality of Student Records

Student records, including grades, will be handled according to FERPA guidelines.
Please contact Dr. Klein yourself if you have questions about grades.

Subject to Change Statement

All information presented in the course syllabus, other than the grade and absence policy, may be subject to change with advance notice, as deemed appropriate by the instructor.

University-Wide Policies

Policies established by UA regarding *Absence and Class Participation*, *Threatening Behavior*, *Accessibility and Accommodations*, *Code of Academic Integrity*, and *Nondiscrimination and Anti-Harassment* can be found at the Academic Affairs website.

COVID-19

Please consult the University's COVID-19 website for the latest information. Any changes to this course's schedule, modality, or meeting location will be communicated through D2L.

Voluntary, free, and convenient COVID-19 testing is available for students on Main Campus and the COVID-19 vaccine is available for all students at Campus Health.

Class Recordings

For lecture recordings, which may be used at the discretion of the instructor, students must access content in D2L only. Students may not modify content or re-use content for any purpose other than personal educational reasons. All recordings are subject to government and university regulations. Therefore, students accessing unauthorized recordings or using them in a manner inconsistent with UArizona values and educational policies (Code of Academic Integrity and the Student Code of Conduct) are also subject to civil action.

Approx. Course Schedule & Due Dates

The schedule for this course can be found at this link. The schedule may be updated throughout the semester, with significant updates announced in class and over D2L.
